

DARE TO MAKE AN IMPACT?

JOIN OUR DARING TEAM AS...

IT Architect Cloud Solutions

Düsseldorf

WHAT YOU'LL DO

- Own the platform roadmap, backlog, and technical architecture, ensuring scalability, security, and cost efficiency
- Define and enforce technical standards for deployment, automation, and security
- Create, manage, and share the platform vision as well as technology & data strategy, including the roadmap
- Ensure platform and product architecture adoption, leveraging APIs, Microservices, and standardized data definitions
- Oversee the deployment, configuration, and management of cloud infrastructure across multiple platforms (e.g., AWS, Azure, Google Cloud)
- Collaborate with engineering, security, and compliance teams to implement best practices and maintain platform integrity
- Work closely with SREs to ensure platform operability and smooth transition of 24/7 operations
- Align with business stakeholders and the Platform Manager for governance, documentation, and process improvements

WHAT MAKES YOU A GOOD FIT

- Bachelor's or master's degree in informatics or relevant field
- 10+ years of relevant work experience in platform architecture, cloud engineering, or related fields
- Strong expertise in cloud platforms (AWS, Azure, Google Cloud) and infrastructure automation
- Experience defining and implementing scalable, secure, and cost-efficient architectures
- Ability to collaborate with cross-functional teams, including engineering, security, and business stakeholders
- Fluent English skills
